

Lesson 1:

Do you think the house in the image is actually in the Malaysian rainforest? Give evidence to support your answer.

Who might live in a house like this? Explain your answer.

Living in this house in the rainforest would be very different to living in a house in a city. Give three examples of how it would be different.

How is living in the rainforest different to where you live now?

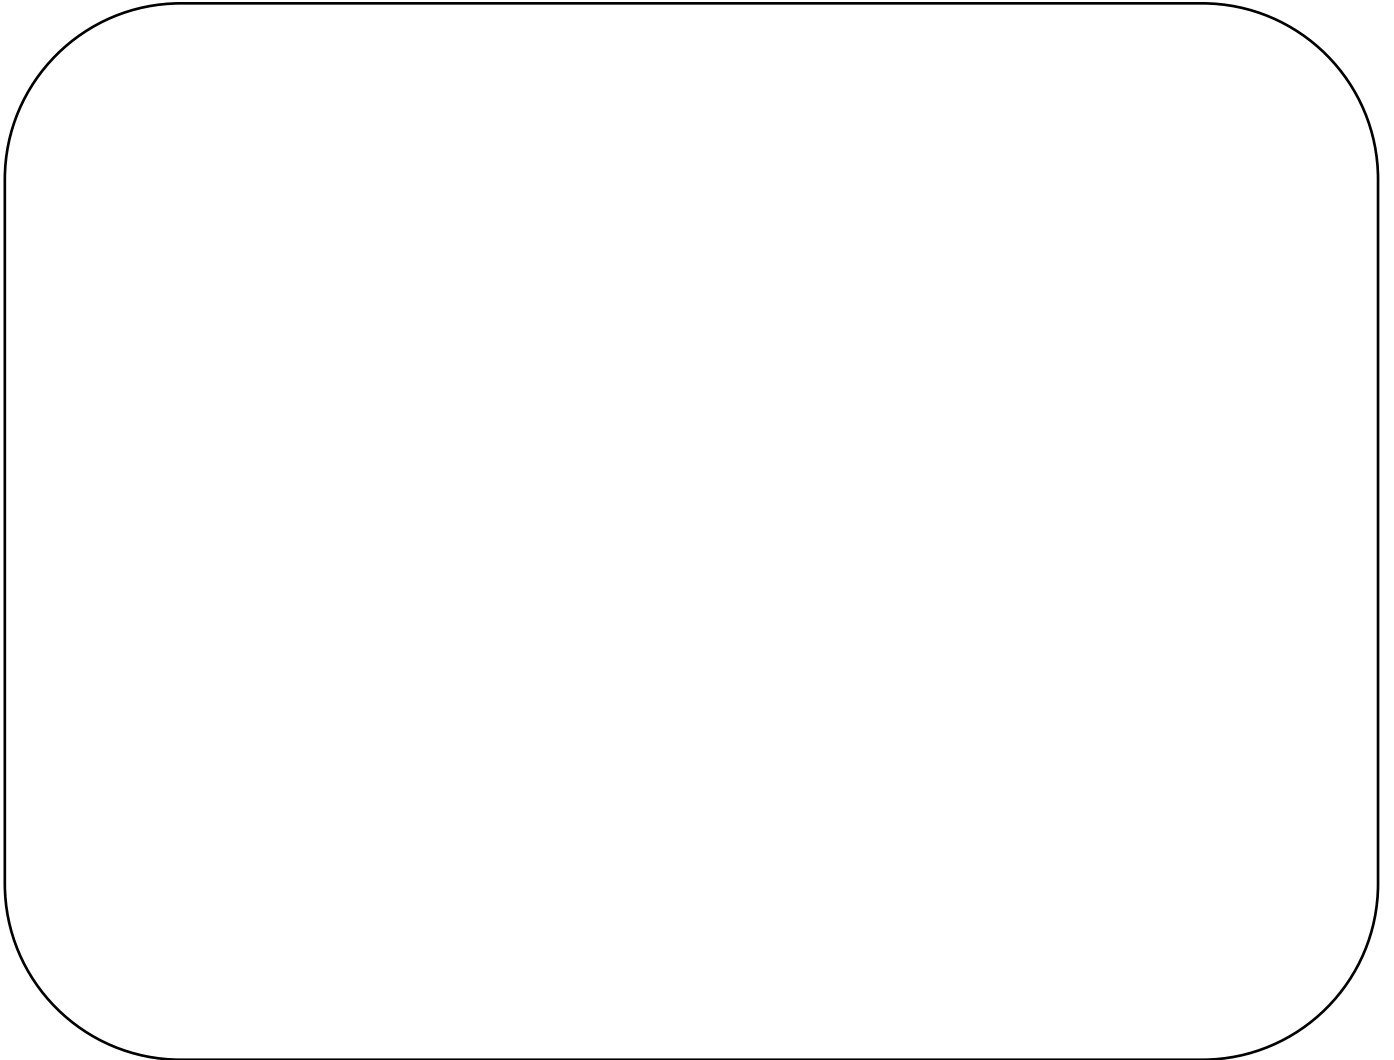

Lesson 2:

We cannot see the inside of the house. Draw what you think it would look like inside.

Think about:

What might you need in your house if you lived in a rainforest?

How might it be decorated?

Add labels to your drawing to make it really clear can be found inside.

Lesson 3:

Can you come up with some phrases to describe different objects or parts in the rainforest.

Think about:

- Leaves (shape, colour, size)
- Animals (what are they doing, how are they moving)
- Noises (what can you hear, is it nearby or far away).
- Smell (can you smell anything?)

Write some sentences which describe what is happening in the rainforest
